

The 2013 Import and Export Market for Synthetic Rubber and Factice from Oils Including Natural Rubber Mixtures in Hungary

On the demand side, exporters and strategic planners focusing on synthetic rubber and factice from oils including natural rubber mixtures in Hungary face a number of questions. Which countries are supplying synthetic rubber and factice from oils including natural rubber mixtures to Hungary? How important is Hungary compared to others in terms of the entire global and regional market? How much do the imports of synthetic rubber and factice from oils including natural rubber mixtures vary from one country of origin to another in Hungary? On the supply side, Hungary also exports synthetic rubber and factice from oils including natural rubber mixtures. Which countries receive the most exports from Hungary? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for synthetic rubber and factice from oils including natural rubber mixtures in Hungary. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for synthetic rubber and factice from oils including natural rubber mixtures for those countries serving Hungary via exports, or supplying from Hungary via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where Hungary fits into the world market for imported and exported synthetic rubber and factice from oils including natural rubber mixtures. The total level of imports and exports on a worldwide basis, and those for

Hungary in particular, is estimated using a model which
