

## Coral Thief

A young scientist becomes involved with a mysterious band of antiquities robbers in the heady atmosphere of nineteenth-century Paris. A powerful and thrilling novel from the author of GHOSTWALK. Paris, 1815. Napoleon has just surrendered at Waterloo and is due to begin his exile. Meanwhile, Daniel Connor, a young medical student from Edinburgh, has just arrived in Paris to study anatomy at the Jardin des Plantes - only to realise that his letters of introduction and a gift of precious coral specimens, on which his tenure depends, have been stolen by the beautiful woman with whom he shared a stagecoach. In the fervour and tumult of post revolutionary Paris, nothing is quite as it seems. In trying to recover his lost valuables, Daniel discovers that his beautiful adversary is in fact a philosopher-thief who lives in a shadowy world of outlaws and emigres. As Daniel embark on a passionate love affair with the Coral Thief, he is drawn to join her salon of thieves to execute one last breathtakingly bold robbery...
