

The 2011 Import and Export Market for Woven Fabrics of Less Than 85% Polyester Staple Fibers by Weight, Mixed Mainly with Cotton, Not Exceeding 170 G/M2 in the Netherlands

On the demand side, exporters and strategic planners focusing on woven fabrics of less than 85% polyester staple fibers by weight, mixed mainly with cotton, not exceeding 170 g/m² in the Netherlands face a number of questions. Which countries are supplying woven fabrics of less than 85% polyester staple fibers by weight, mixed mainly with cotton, not exceeding 170 g/m² to the Netherlands? How important is the Netherlands compared to others in terms of the entire global and regional market? How much do the imports of woven fabrics of less than 85% polyester staple fibers by weight, mixed mainly with cotton, not exceeding 170 g/m² vary from one country of origin to another in the Netherlands? On the supply side, the Netherlands also exports woven fabrics of less than 85% polyester staple fibers by weight, mixed mainly with cotton, not exceeding 170 g/m². Which countries receive the most exports from the Netherlands? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for woven fabrics of less than 85% polyester staple fibers by weight, mixed mainly with cotton, not exceeding 170 g/m² in the Netherlands. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for woven fabrics of less than 85% polyester staple fibers by weight, mixed mainly with cotton, not exceeding 170 g/m² for those countries serving the Netherlands via exports, or supplying from the Netherlands via

imports. It does so for the current year based on a variety of key historical indicators and econometric models.
