

The 2013 Import and Export Market for Seat That Convert into Beds Excluding Garden Seats and Camping Equipment in Romania

On the demand side, exporters and strategic planners focusing on seat that convert into beds excluding garden seats and camping equipment in Romania face a number of questions. Which countries are supplying seat that convert into beds excluding garden seats and camping equipment to Romania? How important is Romania compared to others in terms of the entire global and regional market? How much do the imports of seat that convert into beds excluding garden seats and camping equipment vary from one country of origin to another in Romania? On the supply side, Romania also exports seat that convert into beds excluding garden seats and camping equipment. Which countries receive the most exports from Romania? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for seat that convert into beds excluding garden seats and camping equipment in Romania. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for seat that convert into beds excluding garden seats and camping equipment for those countries serving Romania via exports, or supplying from Romania via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where Romania fits into the world market for imported and exported seat that convert into beds excluding garden seats and camping equipment. The total level of imports and

exports on a worldwide basis, and those for Romania in particular, is estimated using a model which
