

The 2013 Import and Export Market for Revolution Counters, Production Counters, Taximeters, Odometers, Pedometers, Speedometers, Tachometers, Stroboscopes, and Parts Thereof in Norway

On the demand side, exporters and strategic planners focusing on revolution counters, production counters, taximeters, odometers, pedometers, speedometers, tachometers, stroboscopes, and parts thereof in Norway face a number of questions. Which countries are supplying revolution counters, production counters, taximeters, odometers, pedometers, speedometers, tachometers, stroboscopes, and parts thereof to Norway? How important is Norway compared to others in terms of the entire global and regional market? How much do the imports of revolution counters, production counters, taximeters, odometers, pedometers, speedometers, tachometers, stroboscopes, and parts thereof vary from one country of origin to another in Norway? On the supply side, Norway also exports revolution counters, production counters, taximeters, odometers, pedometers, speedometers, tachometers, stroboscopes, and parts thereof. Which countries receive the most exports from Norway? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for revolution counters, production counters, taximeters, odometers, pedometers, speedometers, tachometers, stroboscopes, and parts thereof in Norway. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for revolution counters, production counters, taximeters, odometers, pedometers, speedometers, tachometers, stroboscopes, and parts thereof for those countries serving Norway

via exports, or supplying from Norway via imports. It does so for the current year based on a variety of key historical indicators
