

The 2009 Import and Export Market for Weighing Machinery, Weight-Operated Counting and Checking Machines, Weighing Machine Weights, and Their Parts in Poland

On the demand side, exporters and strategic planners focusing on weighing machinery, weight-operated counting and checking machines, weighing machine weights, and their parts in Poland face a number of questions. Which countries are supplying weighing machinery, weight-operated counting and checking machines, weighing machine weights, and their parts to Poland? How important is Poland compared to others in terms of the entire global and regional market? How much do the imports of weighing machinery, weight-operated counting and checking machines, weighing machine weights, and their parts vary from one country of origin to another in Poland? On the supply side, Poland also exports weighing machinery, weight-operated counting and checking machines, weighing machine weights, and their parts. Which countries receive the most exports from Poland? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for weighing machinery, weight-operated counting and checking machines, weighing machine weights, and their parts in Poland. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for weighing machinery, weight-operated counting and checking machines, weighing machine weights, and their parts for those countries serving Poland via exports, or supplying from Poland via imports. It does so for the current year based on a variety of key historical indicators and econometric

models. In what follows, Chapter 2 begins by summarizing where Poland fits into the world market for imported and
