

ISO 10294-1:1996, Fire resistance tests - Fire dampers for air distribution systems - Part 1: Test method

Gives a test method for the determination of the resistance of a fire damper to heat and the passage of smoke and gases at high temperatures. The purpose is to evaluate the ability of a damper to prevent fire and smoke spreading through an air distribution system. This title may contain less than 24 pages of technical content.
