How important is Norway compared to others in terms of the entire global and regional market? How much do the imports of painters fillings, nonrefractory surfacing preparations, glaziers putty, grafting putty, resin cement, caulking compounds, and other mastics vary from one country of origin to another in Norway? On the supply side, Norway also exports painters fillings, nonrefractory surfacing preparations, glaziers putty, grafting putty, resin cement, caulking compounds, and other mastics. Which countries receive the most exports from Norway? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for painters fillings, nonrefractory surfacing preparations, glaziers putty, grafting putty, resin cement, caulking compounds, and other mastics in Norway. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact.
