

The 2009 Import and Export Market for Polycarbonates, Alkyd Resins, and Other Polyesters in Primary Forms in Australia

On the demand side, exporters and strategic planners focusing on polycarbonates, alkyd resins, and other polyesters in primary forms in Australia face a number of questions. Which countries are supplying polycarbonates, alkyd resins, and other polyesters in primary forms to Australia? How important is Australia compared to others in terms of the entire global and regional market? How much do the imports of polycarbonates, alkyd resins, and other polyesters in primary forms vary from one country of origin to another in Australia? On the supply side, Australia also exports polycarbonates, alkyd resins, and other polyesters in primary forms. Which countries receive the most exports from Australia? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for polycarbonates, alkyd resins, and other polyesters in primary forms in Australia. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for polycarbonates, alkyd resins, and other polyesters in primary forms for those countries serving Australia via exports, or supplying from Australia via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where Australia fits into the world market for imported and exported polycarbonates, alkyd resins, and other polyesters in primary forms. The total level of imports and exports on a

worldwide basis, and those for Australia in particular, is estimated using a model which aggregates
