

The 2011 Import and Export Market for Hot-Rolled, Hot-Drawn, or Extruded Iron and Non-Alloy Steel with U, I, H, L and T Sections of At Least 80 mm High in China

On the demand side, exporters and strategic planners focusing on hot-rolled, hot-drawn, or extruded iron and non-alloy steel with u, i, h, l and t sections of at least 80 mm high in China face a number of questions. Which countries are supplying hot-rolled, hot-drawn, or extruded iron and non-alloy steel with u, i, h, l and t sections of at least 80 mm high to China? How important is China compared to others in terms of the entire global and regional market? How much do the imports of hot-rolled, hot-drawn, or extruded iron and non-alloy steel with u, i, h, l and t sections of at least 80 mm high vary from one country of origin to another in China? On the supply side, China also exports hot-rolled, hot-drawn, or extruded iron and non-alloy steel with u, i, h, l and t sections of at least 80 mm high. Which countries receive the most exports from China? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for hot-rolled, hot-drawn, or extruded iron and non-alloy steel with u, i, h, l and t sections of at least 80 mm high in China. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for hot-rolled, hot-drawn, or extruded iron and non-alloy steel with u, i, h, l and t sections of at least 80 mm high for those countries serving China via exports, or supplying from China via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where China fits into the

world market for
