The new Beerlight novel features the hunt for a missing brain, a plot that only a writer as benevolently unhinged as Steve Aylett could turn into an entertainment. Beerlight is nightmare city of the future (albeit a future that may be only a week away) where violence is the new art form and artists are the only people with regular jobs. In a cartoon landscape, larger-than-life characters act out plots that would be rejected by Hollywood for being too over the top, yet which still carry a serious message about violence in society. This is satire at its most vicious and most pure. Jonathan Swift would understand Beerlight.
