

ISO 5267-2:2001, Pulps - Determination of drainability - Part 2: Canadian Standard freeness method

This part of ISO 5267 specifies a method for determination of the drainability of a pulp suspension in water in terms of the Canadian Standard freeness in millilitres. In principle, this method is applicable to all kinds of pulp in aqueous suspension. This title may contain less than 24 pages of technical content.
