

# ISO/TS 15079:2001, Powered lawn, garden and horticultural equipment - Operator controls - Guidance on actuating forces, displacement, location and methods of operation

This Technical Specification gives guidance on actuating forces for hand and foot controls on powered lawn, garden and horticulture equipment, and their displacement, preferred location and method of operation. It is applicable to operator controls on both ride-on machines and pedestrian-controlled machines. Handheld products are not covered. This Technical Specification is not applicable to passive controls (e.g. seat-activated, operator-presence controls utilized on ride-on machines). It contains data applicable to frequently used controls that require intentional operator actuation for control function. Infrequently used control forces and displacements may exceed the magnitudes given in this Technical Specification.
