

Night Freeze

A chance for a new start... Phoenix Police Detective Niall Malone accepts a job to head up a task force hunting down a serial killer in another state. When at last he reports on the job, after spending some time in a Phoenix hospital, he walks smack into a wall of bigoted feelings toward his outsider status. The defilement of a proud symbol... The killer's main target points to Medical Examiner, Dr. Shyla Clifford. She receives gruesome, butchered pieces of the bodies to identify, usually frozen. The butcher leaves a unique marker on each body part that has everyone in law enforcement and the military deeply disturbed as chaos and the murders reign. A doctor marked for death! Shyla Clifford finds herself fighting to keep her family safe and maintain her new career now that she's retired from the Navy. When pieces of her loved ones keep showing up on her doorstep, among other places, she suffers the kind of fear few ever experience. A detective assigned to head up the task force appears to make little progress in the case as people continue to disappear. Shyla's desperation and anguish grows to the point her professionalism suffers and she struggles to hold fast to her very sanity. Now it's up to her to find the key to the grisly murders; the race is on to find it before everyone in her family is brutally murdered.... And before she becomes the only one left to run for her life.
