

## The 2009 Import and Export Market for Parts for Air or Vacuum Pumps, for Air or Other Gas Compressors and Fans, and for Ventilating, Recycling, or Cooker Hoods with Fan in Sweden

### The 2009 Import and Export Market for Parts for Air or Vacuum Pumps, for Air or Other Gas Compressors and Fans, and for Ventilating, Recycling, or Cooker Hoods with Fan in Sweden

By  
Professor Philip M. Parker, Ph.D.  
Chaired Professor of Management Science  
INSEAD (Singapore and Fontainebleau, France)

On the demand side, exporters and strategic planners focusing on parts for air or vacuum pumps, for air or other gas compressors and fans, and for ventilating, recycling, or cooker hoods with fan in Sweden face a number of questions. Which countries are supplying parts for air or vacuum pumps, for air or other gas compressors and fans, and for ventilating, recycling, or cooker hoods with fan to Sweden? How important is Sweden compared to others in terms of the entire global and regional market? How much do the imports of parts for air or vacuum pumps, for air or other gas compressors and fans, and for ventilating, recycling, or cooker hoods with fan vary from one country of origin to another in Sweden? On the supply side, Sweden also exports parts for air or vacuum pumps, for air or other gas compressors and fans, and for ventilating, recycling, or cooker hoods with fan. Which countries receive the most exports from Sweden? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for parts for air or vacuum pumps, for air or other gas compressors and fans, and for ventilating, recycling, or cooker hoods with fan in Sweden. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for parts for air or vacuum pumps, for air or other gas compressors and fans, and for ventilating, recycling, or cooker hoods with fan for those countries serving Sweden via exports, or supplying from Sweden via imports. It does so for the current year

based on a variety of key historical indicators and econometric models.
