

## The 2009 Import and Export Market for Iron, Steel or Aluminum Reservoirs, Tanks, Vats and Similar Containers with a Capacity of over 300 Liters in Norway

On the demand side, exporters and strategic planners focusing on iron, steel or aluminum reservoirs, tanks, vats and similar containers with a capacity of over 300 liters in Norway face a number of questions. Which countries are supplying iron, steel or aluminum reservoirs, tanks, vats and similar containers with a capacity of over 300 liters to Norway? How important is Norway compared to others in terms of the entire global and regional market? How much do the imports of iron, steel or aluminum reservoirs, tanks, vats and similar containers with a capacity of over 300 liters vary from one country of origin to another in Norway? On the supply side, Norway also exports iron, steel or aluminum reservoirs, tanks, vats and similar containers with a capacity of over 300 liters. Which countries receive the most exports from Norway? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for iron, steel or aluminum reservoirs, tanks, vats and similar containers with a capacity of over 300 liters in Norway. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for iron, steel or aluminum reservoirs, tanks, vats and similar containers with a capacity of over 300 liters for those countries serving Norway via exports, or supplying from Norway via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where Norway fits into the

world market for imported and exported iron, steel or
