

# The 2011 Import and Export Market for Rolls and Sheets of Paper and Paperboard in South Africa

On the demand side, exporters and strategic planners focusing on rolls and sheets of paper and paperboard in South Africa face a number of questions. Which countries are supplying rolls and sheets of paper and paperboard to South Africa? How important is South Africa compared to others in terms of the entire global and regional market? How much do the imports of rolls and sheets of paper and paperboard vary from one country of origin to another in South Africa? On the supply side, South Africa also exports rolls and sheets of paper and paperboard. Which countries receive the most exports from South Africa? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for rolls and sheets of paper and paperboard in South Africa. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for rolls and sheets of paper and paperboard for those countries serving South Africa via exports, or supplying from South Africa via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where South Africa fits into the world market for imported and exported rolls and sheets of paper and paperboard. The total level of imports and exports on a worldwide basis, and those for South Africa in particular, is estimated using a model which aggregates across over 150 key country markets and projects these to the current year. From there, each country represents a percent of

the world market. This market is
