

# Carnivore

A popular fossil field in Arizona has been visited by hundreds of Paleontology students from all over the world for more than half a century. Now, the state of Arizona, utilizing its National Guard, has locked down the area, prohibiting access to the site. The locals have heard rumors about the strange thing discovered in the field, and how six students from the University of Arizona have gone missing. They also heard that one of the students escaped and spoke of seeing a creature that has been extinct for over 65 million years.

Nineteen year old David Baker had one goal in life now. He was determined to go back to the field and save his friends.
