

## Oceans on Fire

When Nathalie Thompsons cameraman doesnt show at the airport alarm bells start to ring. But, with a TV commission on the table and a job to do, she sets off across the world to make a documentary on ocean energy and its positive effects on climate change. As the camera rolls Nathalies worst nightmares slowly unfold; accidents happen, drilling rigs sink and marine structures are mysteriously damaged. At the same time a US senator, involved in a controversial new law concerning ownership of the seas, is caught in a sordid sex scandal. With rumours of bribery and corruption at every turn there s more to her film footage than shale fracking and ocean engineering. In her quest to uncover the truth, Nathalie is in for a nasty surprise as she finds herself embroiled in a dangerous world of conspiracy, mayhem and sabotage.
